PORTFOLIO PROJECT · SYNTHETIC DATA: HARBOURLINE LOGISTICS (FICTIONAL)

Where are we losing people?

Hires, exits and attrition for about 1,300 employees across five departments and five sites, 2023 to 2025.

POWER BI · PORTFOLIO

Year: 2025

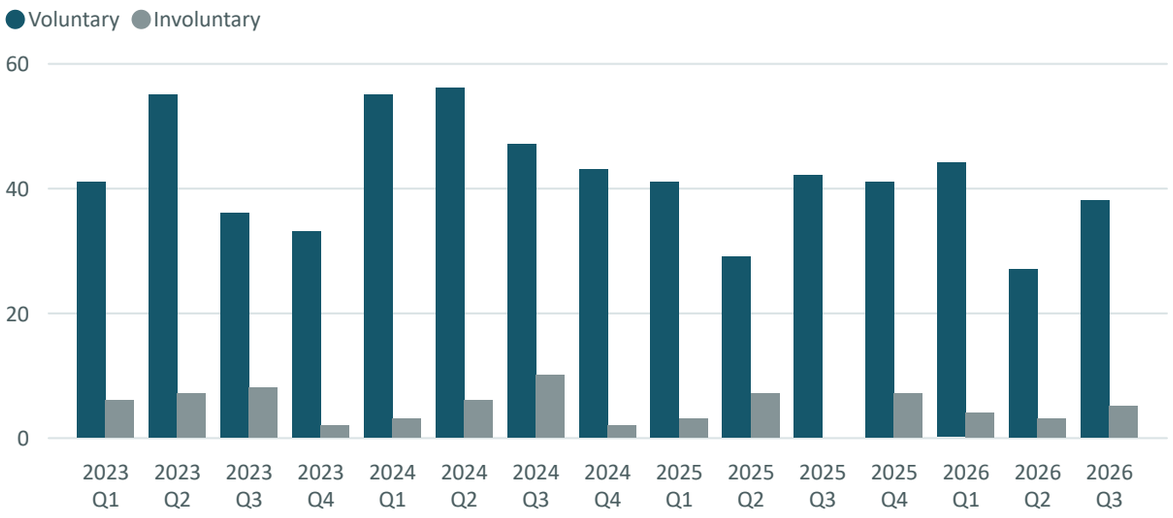

Department: All

Definitions: attrition = exits ÷ average month-end headcount. First-year attrition counts hires with 12 full months of data; regretted = voluntary leavers rated 3 or higher.

Headcount	Hires	Exits	Attrition rate	Regretted exits	First-year attrition
▲ 42 net in period	Started in the year	Voluntary and involuntary	Voluntary 11.9%	121 regretted exits	of 157 hires tracked
1,302	**212**	**170**	**13.2%**	**71%**	**28.7%**

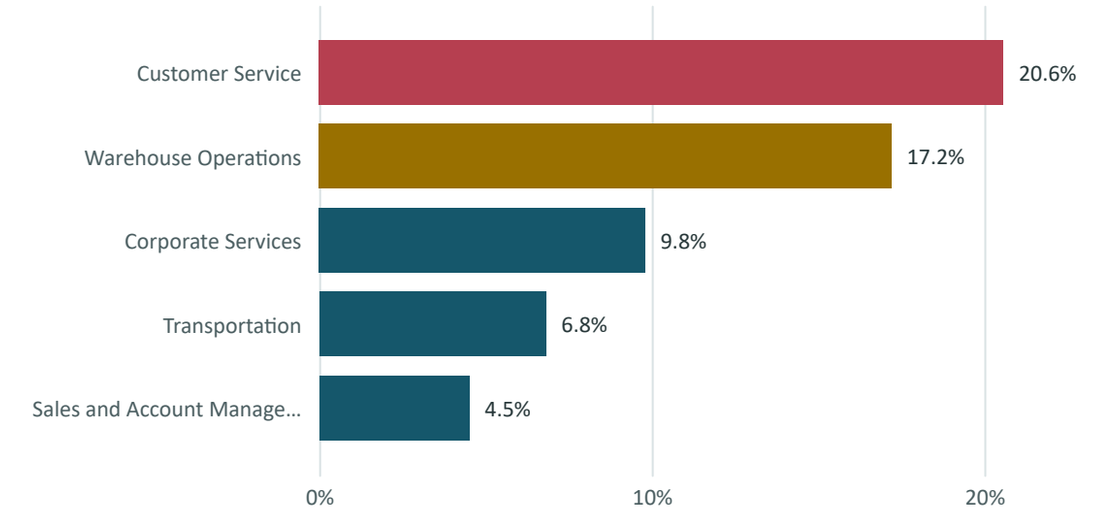

Exits by quarter

All years, voluntary and involuntary. Ignores the year slicer.

Attrition rate by department

Selected year. Blue = under 12%, ochre = 12-18%, red = over 18%.

Movement by department and job family

Selected year. Expand a department to see its job families.

Department	Avg headcount	Hires	Exits	Attrition	Voluntary	First-year	New-hire pulse	Status
Warehouse Operations	529	98	91	17.2%	15.1%	31.5%	3.3	Watch
Customer Service	175	27	36	20.6%	18.9%	52.4%	3.0	Attention
Corporate Services	214	28	21	9.8%	9.8%	21.1%	3.2	On track
Transportation	235	41	16	6.8%	5.5%	14.8%	3.6	On track
Sales and Account Management	133	18	6	4.5%	4.5%	17.6%	3.4	On track
Total	**1,286**	**212**	**170**	**13.2%**	**11.9%**	**28.7%**	**3.3**	**Watch**

What this means

1. The problem is the first year, not the workforce. In 2025, 39% of exits were people with under a year of service; staff with three or more years left at about 9%.

2. Warehouse and Customer Service carry most of the cost. Across 2023-2025 hires they lost about four in ten new hires within a year, against about one in seven in Corporate Services and Transportation.

3. Fix hiring and onboarding before pay bands. Page 2 shows where early exits concentrate: recruitment channel, shift and a few teams.

PORTFOLIO PROJECT · SYNTHETIC DATA: HARBOURLINE LOGISTICS (FICTIONAL)

Why do new hires leave in their first year?

First-year attrition for people hired from 2023 to 2025, by recruitment channel, 90-day pulse score, shift and people leader.

POWER BI · PORTFOLIO

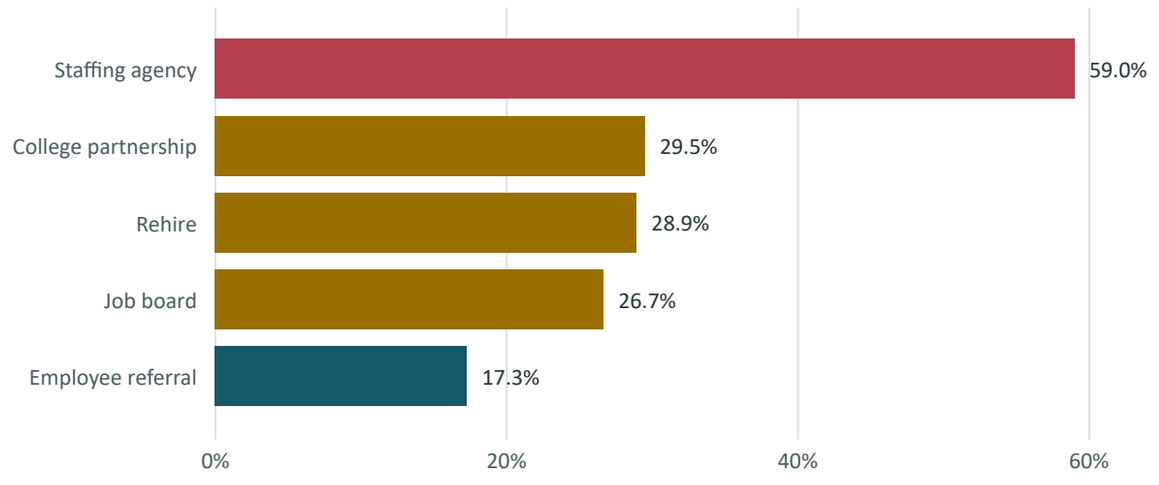

Hire year: All

Department: All

Base: people hired in the selected years (all by default) with 12 full months of data. Bars: blue under 25%, ochre 25-40%, red over 40%.

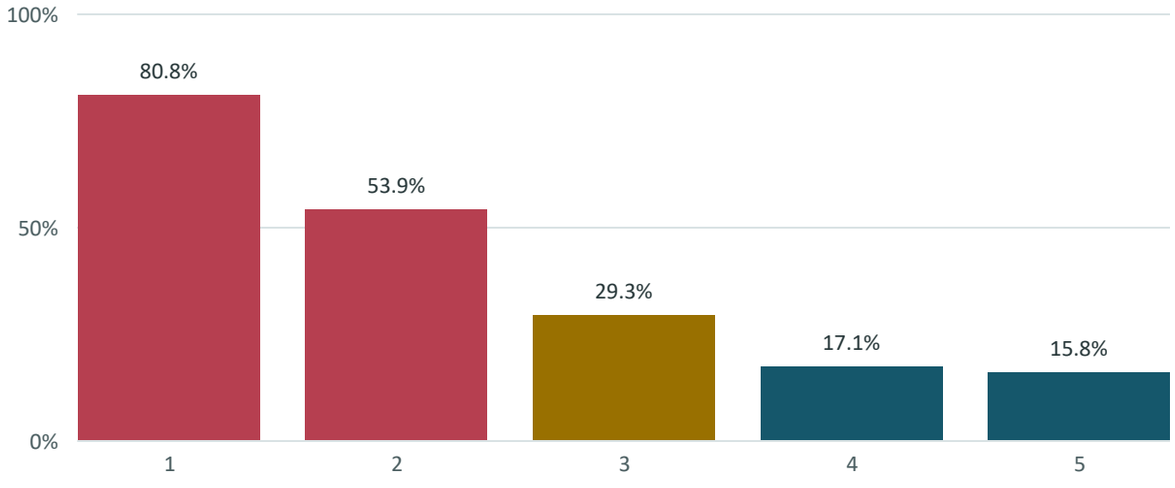

By recruitment channel

Share of hires who left within 12 months.

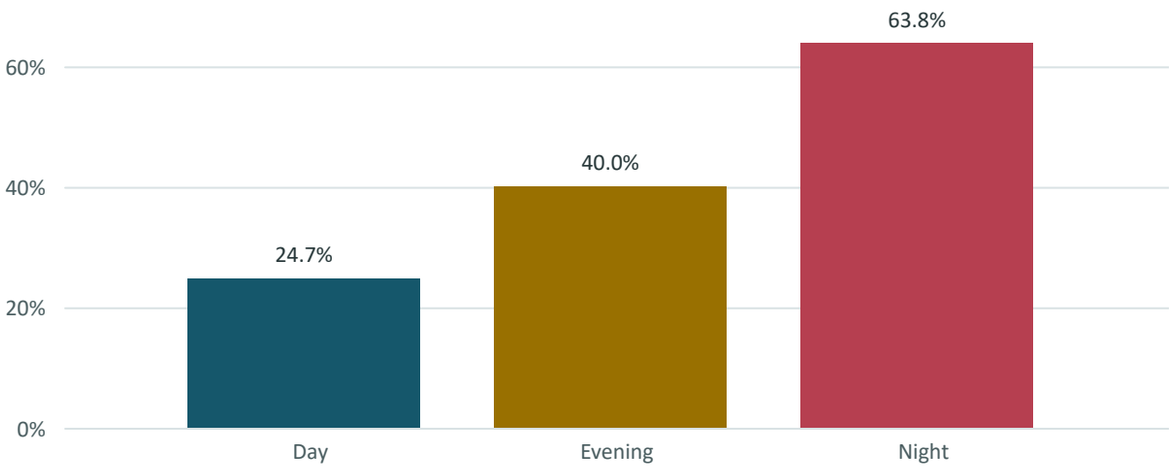

By 90-day pulse score

'I would recommend working here', 1 = strongly disagree, 5 = strongly agree.

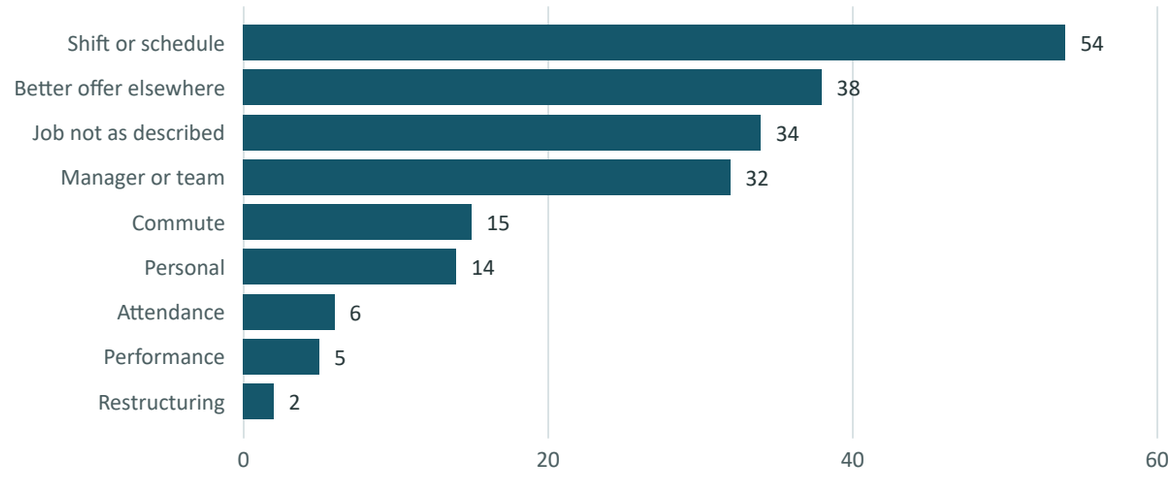

By shift

Warehouse roles work three shifts; office roles are counted as Day.

Reasons given by first-year leavers

Exits within 12 months of hire, from exit interviews and termination records.

First-year attrition by people leader

Leaders with at least 10 tracked hires in the selected years.

Manager	Department	Hires	First-year	New-hire pulse
Mei Campbell	Warehouse Ope…	28	67.9%	2.3
Diego Gagnon	Warehouse Ope…	25	56.0%	3.1
Fatima Iqbal	Warehouse Ope…	31	54.8%	2.5
Anika Singh	Warehouse Ope…	28	53.6%	3.1
Diego Wong	Customer Service	42	50.0%	2.9
Tyler Ali	Warehouse Ope…	30	46.7%	3.2
Zara Gagnon	Warehouse Ope…	17	41.2%	3.2
Total		**647**	**30.9%**	**3.2**

Copilot-ready model

Prepared to Microsoft's Copilot guidance: star schema, business names, a description on every measure and visible column, synonyms in the key measure descriptions, hidden keys and a marked date table. Copilot itself was not run.

Questions it is set up to answer: 'What was first-year attrition for staffing agency hires in 2025?' · 'Which department had the most regretted exits last year?' · 'How did headcount change in Customer Service?'

Security: a People leader role shows each manager only their own team (USERPRINCIPALNAME against Manager Email).

What this means

1. Move hiring spend from agencies to referrals. 59% of agency hires left within a year, against 17% of referred hires.

2. Treat the 90-day pulse as an early warning. Hires who scored 1 or 2 at 90 days left within a year 59% of the time; those who scored 4 or 5, 17%.

3. Start with the night shift and four warehouse teams. 64% of night-shift hires left in their first year (25% on days), and four warehouse leaders lost more than half of their new hires.
