Vatsal Patel

Toronto, ON | pvatsal237@gmail.com | linkedin.com/in/pvatsal237 | pvatsal237.github.io

Core Competencies

- Microsoft BI Expertise: 4+ years with the Microsoft BI stack (SQL Server, SSIS, SSRS, Power BI).
- End-to-End Power BI Development: data preparation, modelling, RLS, visualization, deployment, and workspace management.
- AI-Assisted BI Development: Claude Code, MCP servers, Power BI Project (PBIP) files.
- Agile Project Management: Proven experience collaborating with cross-functional teams in Agile environments, ensuring efficient delivery of analytics projects and alignment with evolving business requirements.
- Process Automation & Optimization: Streamlined complex processes and automated data workflows, resulting in time savings, improved accuracy, and enhanced operational efficiency across the organization.
- Data-Driven Storytelling: Adept at transforming data into actionable insights through compelling visualizations and reports, presenting clear recommendations to leadership and stakeholders.
- Internal Training: Delivered Power BI training to internal stakeholders, fostering data literacy and supporting effective use of BI tools across the organization.
- Adaptability & Growth Mindset: Quick to adopt new technologies and committed to continuous learning.
- Microsoft Certifications: Power BI Data Analyst (PL-300), Fabric Analytics Engineer Associate (DP-600).
- IT Support Background: Active Directory, Entra ID, Intune, account administration, permissions, authentication.
- Networking & Connectivity: VPN, Wi-Fi, LAN connectivity, DNS, DHCP, network troubleshooting, VoIP.
- Incident & Service Management: ServiceNow, Jira, incident management, problem management, change management, SLA management, escalation.

Experience

BI Engineer **Mar 2024 – Present**

Ministry of Children, Community and Social Services, Government of Ontario *Toronto, ON*

- Partnered with policy, program, finance, BI, and application teams to gather requirements and translate business questions into KPIs and Power BI reporting solutions.
- Built and maintained Power BI dashboards on Ontario Works and ODSP caseloads, spend, and intake trends, used by ADMs and program directors for monthly decision-making.
- Delivered executive briefing reports on caseload forecasts and budget variance, supporting ministry planning and budget submissions.
- Developed regional and delivery-agent (CMSM/DSSAB) performance scorecards tracking service targets vs. actuals across municipalities.
- Performed geospatial analysis using Power BI map visuals, leveraging Statistics Canada and university postal code data to enhance geographic insights for strategic decision-making.
- Transitioned 40+ legacy reports, including SSRS, to Power BI, adding interactivity and self-service analysis.
- Introduced AI-assisted Power BI development using Power BI Project (PBIP) files and an MCP server with Claude Code in VS Code, significantly reducing report and semantic model development time for Power BI developers.
- Built data models and complex DAX time-intelligence calculations to support ministry reporting and analysis.
- Designed SQL Server solutions, including stored procedures, views, and staging tables, to streamline data transformation and improve Power BI report performance.
- Centralized reporting in the Enterprise Data Warehouse (EDW) by managing the full SSIS lifecycle (package development, deployment, execution, and production support) and partnering with IT to set up and manage the on-premises data gateway.
- Implemented SSIS control flow tasks and data flow transformations, including For Loop, Foreach Loop, Execute Package, FTP, Bulk Insert, Row Sampling, Fuzzy Lookup, and Fuzzy Grouping, to transform and validate data.
- Monitored, tuned, and optimized SQL Server ETL processes and scheduled jobs to strengthen performance and ensure consistent data delivery.
- Integrated data from third-party platforms (SurveyMonkey, Qualtrics, Vocantas) into the EDW, owning the end-to-end report development cycle, including design, testing, and deployment.

- Migrated Excel data sources from shared drives to SharePoint, simplifying data ingestion and scheduled refresh in Power BI and improving team collaboration.
- Automated recurring ministry reports, reducing manual effort and turnaround time.
- Oversaw data quality and reconciliation for program and caseload data, resolving data issues and performing unit testing to ensure accurate, consistent, and reliable reporting.
- Provided ad hoc analysis and data extracts for executives and ministry requests under tight deadlines.
- Prepared and maintained documentation for reports, KPIs, metrics, and data processes to improve consistency, knowledge transfer, and SDLC alignment.
- Coordinated Power BI license requests, built custom reports to monitor Microsoft Entra ID (Azure AD) user groups, and provided onboarding resources for new users.

Data Analyst **Sep 2022 – Feb 2024**

Spadeworks (Banking and Healthcare clients) *Toronto, ON*

- Developed Power BI dashboards for ED metrics, including visits by CTAS, age group, arrival mode, and demographics.
- Prepared SQL views to calculate ED time intervals (arrival, triage, assessment, decision-to-admit) and length of stay.
- Tracked ED length of stay for admitted vs. non-admitted patients against provincial targets, supporting monthly performance reviews and Pay-for-Results reporting.
- Reported LWBS rates by hour and CTAS, helping identify high-risk periods and triage staffing gaps.
- Analyzed acuity mix, arrival mode, chief complaints, and demographics to show changes in ED demand for leadership teams.
- Automated daily data refresh through SSIS and the Power BI Service, replacing 4 hours/week of manual Excel reporting.
- Enabled the sustainable-finance team to track progress on a $5B green auto-lending target by delivering a Power BI reporting solution over loan, vehicle-registration, and subsidy data.
- Identified 6 high-adoption EV regions by linking subsidy data to market demand, guiding dealer and marketing campaigns that increased green-vehicle loan volume by 24% compared to the previous year.

IT Operations Analyst **Feb 2019 – Jan 2022**

Ministry of Public and Business Service Delivery and Procurement, Government of Ontario *Toronto, ON*

- Prioritized and resolved high-impact incidents affecting senior users while providing timely updates, coordinating technical escalations, and following issues through to resolution.
- Troubleshot Windows 10, macOS, Microsoft 365, Active Directory, Azure AD, VPN, browsers, mobile devices, hardware, software, and network connectivity issues.
- Supported Microsoft 365 applications, including Outlook, Teams, Word, Excel, PowerPoint, OneNote, and OneDrive, while assisting users with configuration, troubleshooting, and adoption of new features.
- Managed user accounts, authentication issues, password resets, account unlocks, permissions, and access-related requests across enterprise environments.
- Documented incidents, troubleshooting steps, resolutions, and recurring issues while following established support procedures, security requirements, and service standards.

Education

Professional Development – Microsoft Business Intelligence Stack (SQL Server, SSIS, SSRS, and Power BI) Dec 2021

Postgraduate Diploma – Supply Chain Management & Global Logistics | Seneca College, Toronto, ON Dec 2018

Postgraduate Diploma – Project Management | Centennial College, Toronto, ON Jan 2018

Bachelor of Technology – Mechanical | SunRise University, India May 2016
